

HOOD C

PROTECTIVE HOOD FOR OUTDOOR DETECTORS

HOOD C is designed for outdoor detectors, including **AOD-200** and all **OPAL** models. The hood protects the detector from precipitation (rain, snow) and from dirt (dust, etc.). This is particularly useful in the **OPAL** series detectors as it significantly reduces the risk of anti-masking function being disturbed. **HOOD C** is made of high quality polycarbonate, which provides high mechanical strength. Quick and easy installation of the hood (with two snap catches) on the detector enclosure does not require the use of any tools.

The **HOOD C** protection is available in two color versions: white **HOOD C** and gray **HOOD C GY**.

- protection of the detector against atmospheric precipitation, pollution, etc.
- fastened with snap catches, without using any tools
- high quality material to ensure high durability
- designed for: **AOD-210**, **AOD-210 GY**, **AOD-200**, **AOD-200 GY**, **OPAL**, **OPAL GY**, **OPAL Plus**, **OPAL Plus GY**, **OPAL Pro**, **OPAL Pro GY**
