

BRACKET E-5

BALL-JOINT HOLDER FOR OPAL/AOD-210 OUTDOOR DETECTORS.

BRACKET E-5 is part of the **BRACKET E** ceiling-and-wall mount distance holder.

The element is intended for mounting the OPAL (GY), OPAL Plus (GY), OPAL Pro (GY) and AOD–210 (GY) detectors.

The holder allows adjustment of the detector tilt angle in two planes: vertically up to 60° and horizontally up to 90°. This helps you find optimal position of the detector in relation to the protected area.

BRACKET E–5 is mounted on the **BRACKET E–1 (GY)** body. The **BRACKET E–2B (GY)** insert and the **BRACKET E–6** tamper sensor are mounted to the holder.
