

ROP-GLASS

REPLACEMENT GLASS PANE FOR ROP-100/101 (10-PACK)

ROP-GLASS is a set of 10 spare glass panes. The glass pane is an element of the construction of **ROP-100/EU** and **ROP-101/EU** manual call points. Breaking the glass pane opens the switch and, consequently, triggers an alarm. For the call point to continue to serve its intended purpose, the broken glass pane must be replaced with a new one.

- component of ROP-100/EU and ROP-101/EU construction that enables an alarm to be triggered
- an alternative to the plastic insert (available with the manual call point and included in the **ROP-PLASTIC** set)
- for single use
- the pack contains 10 panes
