

ROP-PLASTIC

REPLACEMENT PLASTIC INSERT FOR ROP-100/101 (10-PACK)

ROP-GLASS is a set of 10 spare plastic inserts (panes). The plastic insert is a component of the construction of **ROP-100/EU** and **ROP-101/EU** manual call points. Pushing in the insert opens the switch and, consequently, triggers an alarm. For the call point to continue to serve its intended purpose, the pushed-in insert must be reset using the key or replaced with a new one.

- component of ROP-100/EU and ROP-101/EU construction that enables an alarm to be triggered
- an alternative to the glass pane (available with the MCP and included in the **ROP-GLASS** set)
- for multiple use
- the pack contains 10 inserts
