

WZ-100

STATUS INDICATOR

The external status indicator enables a quick identification of the source of the fire detection signal, and it achieves this by doubling the functionality of the indicator which is built-in the housing of the detector. Such external indicator is especially useful if the detector is mounted in an area with limited visibility of the built-in indicator.

- LED visual signalling system
- aesthetic appearance suitable for the majority of interiors
- simple installation

TECHNICAL DATA

Enclosure dimensions	ø 97 x 37 mm
Operating temperature range	-10 °C...+55 °C
Supply voltage	up to 2,4 V DC
Weight	48 g
Maximum humidity	93±3%
Average current draw (from the detector)	4...4,4 mA
Maximum current (requires an external current limiter)	up to 10 mA
