

B-4S

GATE MAGNETIC CONTACT (METAL HOUSING)

Magnetic contacts are basic elements of a perimeter protection system. Small **B-4S** tight magnetic contacts in a metal housing are designed for surface mounting. The metal screen protects the wiring against damage, which makes these contacts a perfect solution for locations particularly vulnerable to sabotage attempts or mechanical exposure. These contacts are screwed to a surface and provide an ideal solution for garage gate installation.

- surface mounted (screw mount)
- rugged, metal sealed body
- armored cable

TECHNICAL DATA

| | |
|--|------------------------|
| Environmental class according to EN50130-5 | II |
| Maximum humidity | 93±3% |
| Max. switched current | 400 mA |
| Max. reed switched voltage | 100 V DC |
| Weight | 270 g |
| Break distance | 80 mm |
| Make distance | 75 mm |
| Detector type (outside magnetic field) | NO |
| Reed switch enclosure dimensions | 104,5 x 44,5 x 11,5 mm |
| Dimensions magnet enclosure | 78,5 x 30 x 30 mm |
| Operating temperature range | -10...+55 °C |
