1. Introductie

Dit document bevat een lijst met functies in de service mode. Tussen haakjes worden de standaard instellingen weergegeven (indien de parameter gedefinieerd is / optie ingeschakeld is).

1.1 Starten van de service mode

1. Voer de **service code in** (standaard: 12345) en druk op de [* 🔥] toets.
2. Het gebruikersmenu zal worden weergegeven.
3. Druk op de [🔧 ▲] toets.
4. Indien de ÷ cursor bij de SERVICE MODE staat, druk dan op [# ◐].
5. De service mode zal worden weergegeven (de ÷ cursor staat nu bij EINDE SERVICE).

1.2 Navigeren door het menu en uitvoeren van functies

Om door het menu te navigeren kunt gebruik maken van de pijltoetsen of middels de numerieke sneltoets combinaties. Het is ook mogelijk om beide methodes te combineren. De ÷ cursor geeft een submenu aan welke u kunt openen of een functie welke uitgevoerd kan worden.

1.2.1 Gebruik van de pijltoetsen

1. Gebruik de [✕ ▼] en [🔧 ▲] toetsen om het gewenste submenu te zoeken.
2. Druk op de [☀ ▶] of [# ◐] toets om het submenu te openen (druk op de [☾ ◀] toets om terug naar het hoofdmenu te gaan).
3. Herhaal stappen 1 en 2 totdat de gewenste functie gevonden is.
4. Druk op de [☀ ▶] of [# ◐] toets om de functie te starten.

1.2.2 Gebruik van numerieke sneltoets combinaties

Alle submenu's en functies zijn genummerd.

1. Gebruik de cijfertoetsen om het nummer in te voeren (druk op de [☾ ◀] toets om het laatste cijfer te verwijderen).
2. Het menu met dit nummer zal worden weergegeven (druk op de [* 🔥] toets om terug te gaan naar het hoofdmenu).
3. Druk op de [☀ ▶] of [# ◐] toets om het submenu te openen of om de functie te starten.

Indien de ÷ cursor bij EINDE SERVICE staat kunt u het nummer van de functie invoeren en daarna drukken op de [☀ ▶] of [# ◐] toets. Bijvoorbeeld: om de uitbreiding identificatie functie te starten drukt u achterelkaar op [2 ABC] [1] [# ◐].

Indien de ÷ cursor niet bij EINDE SERVICE staat, dan zal bij het invoeren van een cijfer deze worden toegevoegd aan het menu vanwaar de cursor zich bevind. Ingevoerde cijfers zullen altijd achter het menu / functienummer worden toegevoegd (alleen EINDE SERVICE is niet genummerd). Bijvoorbeeld: indien de ÷ cursor voor 31.EOL staat en u vervolgens [3 DEF] [2 ABC] intoets, dan zal functie 3132 worden weergegeven (3132.Zn.32 EOL) en niet functie 32.GEVOELIGHEID. Om functie 32.GEVOELIGHEID weer te geven drukt u op [✕ ▼] (om de ÷ cursor naar beneden te verplaatsen) of op [☾ ◀] [2 ABC] (om de 1 van 31 te wissen en de 2 toe te voegen).

Indien u het nummer van het submenu/functie weet en fouten wilt voorkomen, druk dan eerst op de [*] toets en voer daarna het nummer in.

1.3 Invoeren van gegevens

Het invoeren / bewerken van gegevens hangt af van de methode. Ingevoerde gegevens zullen worden opgeslagen na het indrukken van de [#] toets. Het indrukken van de [*] toets beëindigd de functie zonder de wijzigingen op te slaan.

1.3.1 Selectie uit een enkelvoudig keuzelijst

De geselecteerde functie wordt op de onderste regel van het display weergegeven. Gebruik de [×|▼] en [↶|▲] toetsen om de gewenste functie te zoeken.

1.3.2 Selectie uit een meervoudige keuzelijst

De onderste regel van het display zal één van de functies weergeven waaruit u kunt kiezen. Gebruik de [×|▼] en [↶|▲] toetsen om de gewenste functie te zoeken. Het volgende symbool wordt in de rechter bovenhoek van het display weergegeven:

■ – de functie is geselecteerd / optie is ingeschakeld,

· – de functie is niet geselecteerd / optie is uitgeschakeld.

Druk op een willekeurige numerieke toets om het symbool te wijzigen.

Indien u de status van alle items wenst te zien (bijv. zones, uitgangen, opties, etc.), druk dan op de [☀|▶] of [☾|◀] toets. De nummers rondom het display zijn voor identificatie van de items. Gebruik de [☀|▶] en [☾|◀] toetsen om de cursor te verplaatsen. Nadat de cursor bij de gewenste functie staat kunt u de status hiervan wijzigen door een willekeurige cijfertoets in te drukken. Indien u terug wilt keren naar de normale weergave, druk dan op [×|▼] of [↶|▲].

1.3.3 Invoeren van decimale waarden

Om cijfers in te voeren gebruikt u de numerieke toetsen. Gebruik de [☀|▶] en [☾|◀] toetsen om de cursor te verplaatsen. De [↶|▲] toets verwijdert bij sommige functies het karakter aan de linkerzijde van de cursor.

1.3.4 Invoeren van hexadecimale waarden

Om cijfers in te voeren gebruikt u de numerieke toetsen. Om A, B en C karakters in te voeren gebruikt u de [2 ABC] toets en voor D, E en F de [3 DEF] toets (druk de toets meerdere malen in totdat het gewenste karakter verschijnt). Gebruik de [☀|▶] en [☾|◀] toetsen om de cursor te verplaatsen. De [↶|▲] toets verwijdert het karakter aan de linkerzijde van de cursor.

1.3.5 Programmeren van telefoonnummers

Om cijfers in te voeren gebruikt u de numerieke toetsen. Om de +, ∗ en # karakters in te voeren drukt u op de [0] toets (druk de toets meerdere malen in totdat het gewenste karakter verschijnt). Gebruik de [☀|▶] en [☾|◀] toetsen om de cursor te verplaatsen. De [↶|▲] toets verwijdert het karakter aan de linkerzijde van de cursor.

1.3.6 Namen invoeren

De karakters welke ingevoerd kunnen worden via de toetsen worden weergegeven in tabel 1. Druk de toets meerdere malen in totdat het gewenste karakter verschijnt. Druk lang op de toets om het toegewezen cijfer weer te geven.

Aan de linker bovenzijde van het display wordt informatie over de letter grootte weergegeven: [ABC] of [abc] (deze wordt getoond na het indrukken van een willekeurige toets en zal voor een paar seconden zichtbaar worden na de laatste toetsaanslag).

Gebruik de ☀|▶ en ☾|◀ toetsen om de cursor te verplaatsen. De 🔧|▲ toets verwijdert het karakter aan de linkerzijde van de cursor.

Toets	Karakters beschikbaar na het indrukken van een toets																	
1	!	?	'	`	↵	"	{	}	$	%	&	@	\	^	|	☕	#	1
2 ABC	a	b	c	2														
3 DEF	d	e	f	3														
4 GHI	g	h	i	4														
5 JKL	j	k	l	5														
6 MNO	m	n	o	6														
7 PQRS	p	q	r	s	7													
8 TUV	t	u	v	·	🖶	▇	🔒	↑	←	→	↓	8						
9 WXYZ	w	x	y	z	9													
0		.	,	:	;	+	-	*	/	=	_	<	>	(	)	[	]	0

Tabel 1. Karakters beschikbaar bij invoer van namen. Hoofdletters zijn beschikbaar onder dezelfde toetsen (om de lettergrootte te wijzigen drukt u op de ✖|▼ toets).

1.4 Verbergen van de service mode

U kunt de service mode verbergen via de 09.VERBERG SM functie. Het alarmsysteem zal in de service mode blijven, maar zal niet worden weergegeven in het display. Deze functie is handig indien u bijv. weg wilt gaan bij het bediendeel en u wilt voorkomen dat ongeautoriseerde personen tussentijds toegang zouden hebben tot het bediendeel. Om weer toegang te krijgen tot het menu gaat u op dezelfde manier te werk als bij het binnengaan van de service mode.

1.5 De service mode beëindigen

Druk meerdere malen op de * 🔥 toets tot de → cursor EINDE SERVICE aangeeft en druk vervolgens op # ◧.

2. Het service mode menu
